DATA SHEET 6000-Series Side-Seal Drop Elbow

The Dixon side-seal drop elbows provide easy quick connection and disconnection to discharge hoses from a road tanker to a fill point on underground storage tanks, allowing for quick and safe product transfer. Spring-loaded levers allow the elbows to snap on securely to a side seal tight fill adaptor with minimal pressure.

Features

- · Modular design, easy repair or replacement
- Bolt-on heavy duty construction
- Driver friendly carrying grip for balanced handling
- · Large sight glass and gasket seals for easy replacement
