Dixon™ Bayco Product Indicator

DIXON
*The Right Connection®*

Product Indicators allow the tanker driver to manually select and display the product in the corresponding tanker compartment. Dixon Bayco DBPI120 Product Indicator features 12 individual positions, which enables 12 different products to be displayed.

Designed to mounted directly to a 4" TTMA flange. The DBPI120 can easily be retrofitted to any tanker that currently has API Adaptors installed.

Features
- Multi product grade indicator
- Simply pull and turn the handle until the required information is displayed
- Capable of displaying 12 user selectable product identification labels
- Can be mounted in typical locations near API with standard bolt hole pattern
- Customisable label sheets available by request
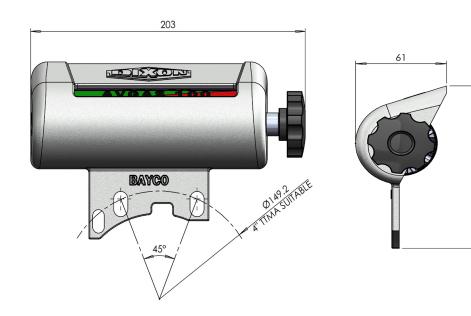

Sizes
- Weight - 0.6 kg

Materials
- Cast aluminium

Specifications
- All label colours are aligned to the colour codes set out in the SLP operating Standard 5, Section 6.2 surface markers and Road Tanker Tumbler.
