TTMA Sightglass Flange

Dixon offers a TTMA sight glass flange which allows for visual identification of product in the run down piping prior to the opening of the API valve. The TTMA pre-drilled holes are to standard so the unit will fit behind an API adaptor as well as a Dixon butterfly valve.

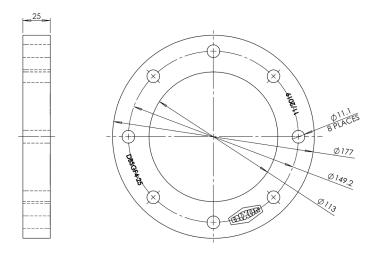

Material

Acrylic

Specifications

- · Maximum pressure: 1000 kPa
- Maximum temperature: 70°C (158°F)
- · Fully machined to precise tolerances
- · Batch marked for traceability
