

Ultra-Lok® Band Style Clamping Systems

Features:

- Ultra-Lok provides a fast, reliable, consistent clamp made from 3/4", 1/4 hard, high tensile 201 stainless steel for unequalled strength and reliability. The powerful, portable UL9000 tool lets you apply clamps anywhere there is an AC outlet. Ultra-Lok's smooth ID seals tight with a gap-free, 360° seal and since the design allows locking under full tension, clamps resist rotation on pole applications.
- Preformed clamps available in sizes from 2" to 9" diameter.
- Speed/torque setting on tool for consistent repeatable tensioning.
